

CONSTRUCTION GUIDE

Construction notes

Check the doors for notices:

The contractor will routinely notify residents about upcoming work by posting a notice at the door, particularly if the work will make driveways inaccessible for part of the day. Crews are not always able to identify which doors residents use, so please check all of the doors at home for notices.

Schedule may change: Weather, delays by subcontractors and other unforeseen events can cause schedule changes. The contractor will make every effort to notify residents as soon as possible.

Recycling, garbage: Recycling and garbage collection should remain as scheduled. For missed recycling collection, call the Recycling Line at 763-509-5906. For missed garbage collection, please contact your hauler.

Special accommodations: The contractor will work with residents who need access for wheelchairs, Metro Mobility rides, etc. Call Project Inspector Pavel Nikolov at 763-509-5528.

Private utilities: Private utilities, such as gas, electric, cable TV or telephone, may occasionally be damaged during construction. If this happens, the contractor is responsible for contacting the service provider. If you feel the service is not restored in a timely manner, please call the utility provider's customer service line.

Construction activities scheduled to begin May 31

The Plymouth City Council awarded the contract for the Candlelight Terrace Street Reconstruction Project May 14 to GMH Asphalt Corporation. As the general contractor for the project, GMH Asphalt has indicated it plans to begin construction activities Friday, May 31, beginning with removals (items such as pavement or driveways marked in the plans), water main replacement and storm sewer installation in Phase I. Once pipe installation is completed in one phase, the contractor will start construction activities in the next phase.

Tree Removal: Prior to reconstructing the roadway, the contractor must remove some trees within the project area starting on Friday, May 31 –

Storm sewer installation, water main replacement and removals are set to begin Friday, May 31 in Phase I.

those trees will have been marked for removal by Wednesday, May 22. Every effort has been made to minimize the amount of tree removals necessary for the project. If you have questions or concerns about trees marked for removal, please contact the project inspector.

Landscaping, sprinklers, mailboxes and project access

Construction in the right-of-way:

Please note that items located in the city right-of-way – typically 10 to 15 feet beyond the edge of the pavement – could be impacted during construction. Typical construction limits extend a minimum of five feet behind the current edge of pavement, but may extend to 10

feet on some properties. In addition, areas within 10 feet of a water curb stop or fire hydrant will be impacted.

Landscaping, sprinklers and

underground fences: Residents who wish to keep any landscaping in the areas listed above should remove
Project access ... continued on page 2 >

Project access ... from page 1

these items. Disturbed areas will be restored with sod once construction is complete. Any sprinkler systems or underground dog fences damaged during construction are the contractor's responsibility to repair. Any assistance residents can provide in marking these items is appreciated.

Mailboxes: Prior to construction, the Post Office requires the contractor to remove all mailboxes and create a "bank" of mailboxes at a central location. The bank of mailboxes will

be tentatively located near Olive Lane, just north of 25th Avenue. Mailboxes will be relocated in phases as identified in the map on the previous page. Mailboxes in Phase 1 will be relocated by June 4. Residents in other phases will be notified roughly one week prior to relocation.

Driveway access: Residents will have access to their driveways at the end of each day, but there may be periods during the day where driveway access will be limited. We appreciate your patience during this process.

Safety is our number one priority

Please remember that construction sites can be very dangerous places. Heavy equipment will be utilized in the project area and paving operations will place blacktop at temperatures in excess of 300

degrees. We realize that both children and adults may wish to watch the construction activity, but please make sure that everyone is keeping a safe distance. Remember – safety first.
